

NGUYỄN PHẠM HOÀNG LONG

Middle - Frontend

0795509536 | nguyenvphamhoanglong2000@gmail.com | Hồ Chí Minh

ABOUT ME

I am currently working as a Frontend Developer. I have more than three years of experience in web application development. I value continuous learning and actively seek opportunities to improve my skills and adapt to evolving technologies. I aim to grow through practical experience and contribute effectively in both professional and remote environments.

WORK EXPERIENCE

11/2025 - Present **MONA HOST COMPANY LIMITED | HOSTING PROVIDER MANAGEMENT**
Frontend Developer

Introduce: A **SaaS** CRM platform for hosting providers, enabling management of VPS, domains, and SSL services for multiple tenants.

Programming languages: Nextjs, Shadcn, TailwindCSS

- Implement modules management: tenants, customers, products, services, orders, invoices, wallet, setting config
- Collaborated with the Product Owner to build workflows for product ordering, payment processing, and tenant fund management
- Built a tenant-based configuration system enabling independent management with custom policies and benefits per tenant.
- Implemented authentication and authorization using role-based access control (**RBAC**).

09/2025 - 01/2026 **SYSTEM 443 COMPANY LIMITED | MEKONG FROZEN FOODS**
Fullstack

Introduce: Corporate website for Mekong Frozen Foods, the leading company in Vietnam's food distribution sector, specializing in frozen products.

Programming languages: Nextjs, Shadcn, PayloadCMS, TailwindCSS

- Implement modules management: products, news, recipes, FAQs
- Developed **reusable UI components** and integrated **RESTful APIs** to build frontend modules, and implemented responsive design across devices
- Optimized website **SEO** by implementing dynamic metadata,
- Built structured data, XML sitemap
- Applied **server-side rendering (SSR)** where necessary to improve SEO performance.
- Designed and implemented MongoDB database structures to support website functionality

05/2025 - 10/2025

MONA HOST COMPANY LIMITED | HT ELECTRONIC

Frontend Developer

Introduce: Developed a SaaS-based CRM system for managing customers, jobs, and business operations.

Programming languages: Nextjs, Shadcn, TailwindCSS

- Implement modules management: customers, jobs, tenants, points
- Participated in building end-to-end workflows from customer creation to job processing and complaint handling
- Implemented role-based access control (**RBAC**) with authentication and authorization
- Participated in building workflows from sending referral invitations to worker approval.
- Worked closely with mobile frontend teams, understanding mobile development workflows, release cycles, and platform approval processes (iOS/Android)

08/2023 - 03/2025

MONA MEDIA COMPANY LIMITED | INTERNAL MANAGEMENT SYSTEM

Frontend Developer

Introduce: An internal system for managing leads, customers, employees, KPIs, commissions, leave/OT, and reports.

Programming languages: Nextjs, MUI

- Implement modules management: leads, customers, commissions, leave/OT
- Coordinated with BA, PO, and cross-functional teams to develop reports on revenue, costs, debt, employee KPIs, and payroll
- Collaborated with the business team to develop deal strategies for various project types
- Standardized the end-to-end customer conversion process from lead to final contract signing.

SKILLS

- **Languages:** JavaScript, TypeScript
- **Frameworks:** React.js, Next.js
- **State Management:** Redux, Zustand
- **UI Libraries:** MUI, Antd, Shadcn
- **Styling:** CSS, SCSS, TailwindCSS
- **Data Fetching:** Axios, React Query
- **Soft Skills:** Teamwork, Problem Solving, Work Independently
